1. Garden snails can move as slowly as 0.1 inch per second and as quickly as 0.5 inch per second. For a snail that is continuously moving, which of these $\times$ would be reasonable as to the amount of time it would take a snail to travel 20 inches?

- (A) 2 seconds
- (B) 10 seconds
- (C) 90 seconds
- (D) 400 seconds
