

Praxis Core Math 5733 Exam 2027

Section: 5752 Core Academic Skills for Educators • Total Questions: 1 • Format: Verified Q&A

1. In a survey, a group of 50 randomly selected students at a college were asked if they use public transportation when traveling to the college. The table above shows the results of the survey. If there are 4600 students at the college, what is the most reasonable estimate for the number of students at the college who use public transportation when traveling to the college? Table: Use public transportation: 35, Do not use public transportation: 15*

- (A) 2820
- (B) 2920
- (C) 3020
- (D) 3120
- (E) 3220
