

Praxis Core Math 5733 Exam 2047

Section: 5752 Core Academic Skills for Educators • Total Questions: 1 • Format: Verified Q&A

1. The graph shows the population in the United States of small, medium, and large pet dogs from 1999 to 2013. Assuming that all dogs fit into one of these categories and that each dog fits in only one category, which of the following statements about the population of pet dogs during this time period is supported by the data in the graph?

- (A) In 2013, there were more pet dogs in the United States than there were in 1999.
- (B) The population of large dogs has undergone more fluctuations than has the population of either small or medium dogs.
- (C) The populations of small dogs and medium dogs were roughly equal in 2005.
- (D) In 2010, the population of medium dogs was approximately 24 million.
- (E) The population of small dogs grew after 2013.
