

Praxis Core Math 5733 Exam 2059

Section: 5752 Core Academic Skills for Educators • Total Questions: 1 • Format: Verified Q&A

1. A group of 120 randomly selected residents in a town were asked in a survey whether they support a proposed construction project. The results are shown in the table above. If there are 24000 residents in the town, what is the most reasonable estimate for the number of residents in the town who support the project?

- (A) 16000
- (B) 16500
- (C) 17000
- (D) 18000
